## Vocabulary Learning Exercises

### Using a Dictionary (page x)

1. b 2. c 3. a

### Guessing from Context (page x)

1. the way you feel at a particular time
2. The sentence contains the clue that “nothing made you feel happy,” so *mood* must be something about feelings. The examples show that a “bad mood” is a negative type of feeling.
3. *Mood* and *moody* are part of the same word family (*mood, moody, moodiness, moodily*). The use of *moody* in the later sentence shows that moody people are sometimes avoided by other people, suggesting that it is an unpleasant situation. This gives further clues that a “bad mood” is a negative state of mind.

### Extensive Reading (page xi)

These sentences show three different collocation patterns that are common: *annoying habit(s)*, *eating habit(s)*, and *nervous habit(s)*.

### Thesaurus Plus Dictionary (page xi)

1. Very old people are often described as *elderly*.
2. *Faded* means old, but also describes the fact that something no longer has the color, energy, style, etc., that it once had.
3. *Old* is a very frequent word, and can be used to describe most things that are considered “old,” for example, a desk.
4. *Ancient* is commonly used to describe something that is extremely old (thousands or millions of years old), for example, dinosaurs.

### Using Internet Tools (page xii)

4 Choice **architects** are people who organize the contexts in which **consumers** make decisions. For example, the person who decides the **layout** of your local supermarket—including which **shelf** the peanut butter goes on, and how the oranges are stacked—is a choice architect. So is the person who organizes where the salad and dessert bars are in your school or work cafeteria. And, believe it or not, the arrangements they **adopt** will influence the selections you make, according to Richard Thaler and Cass Sunstein, **professors** at the University of Chicago.

1. the desire to help people with facial recognition problems and to create tools helpful for law enforcement
2. Scientists have found that the Fusiform Face Area (FFA) is the part of the brain used for facial recognition. We need to see the whole face to recognize it, and this happens in three steps: (1) scan the facial features, (2) decide whether we know the face or not, and (3) recall the information connected with the face if we know it.
3. The cuddle chemical seems to link the recognition of familiar faces with emotional responses. In the case of mothers and babies, this response is positive and so leads to bonding.

**Reading****Reading Comprehension** (page 161)

- One definition of *backlash* is “a strong negative reaction by a number of people against recent events, especially against political or social developments.” Parents and teachers fear that too much time on the computer is limiting the amount of face-to-face interaction children and young adults have. Likewise, children are tired of the constant distractions when adults have to cut into family time to attend to e-mail and cell phone calls.
- The evidence includes
  - questionnaire results showed that the more time the respondents spent online, the more socially isolated they became
  - people who spend five-plus hours per week online attended fewer social events than before, spent less time with family, and less time talking to family on the phone
  - people are having less face-to-face interaction with each other in general
  - people are less likely to have a very close friend (“core partner”) to discuss important life issues with.
- Possible answer:* These people may simply have a wider network of friends to draw a core partner from.
- “Spiral of Silence” refers to the problem that some people are so anxious about what other people think, they simply refuse to openly express their opinions. If a large number of people refuse to engage in discussion (e.g., political discussion), it is dangerous because the views of the few can then take over, even though they may not be the majority view.

1.

Differences

**Japanese manga comics**

generally smaller in size, but thicker  
longer  
generally black and white  
several stories  
often written by one individual  
younger, more naive heroes  
non-Japanese contexts  
sales still booming  
wide readership

**American comics**

larger in size, but thinner  
shorter  
full color  
one story and hero  
written by a team  
strong superheroes  
American contexts  
declining sales  
narrower readership, mainly teenage boys

Similarities

large expressive eyes  
heroes have a weakness  
appeared at the start of the twentieth century, but become popular after WWII

- Manga writers have much more control because they do all of the production process.
- The readership of American comics is quite limited, while both men and women in Japan read manga. Manga appeals to readers of most ages in Japan.

#### Choosing Reading Texts (page 217)

A. The famous reporter Tintin has wowed fans for decades. Traveling the world on wild adventures with his dog, Snowy, the comic books contained elements of fantasy, mystery, even political thrillers. And political is exactly what this \_\_\_\_\_ has become.

Originally published in the early 1930s, *Tintin in the Congo* follows the **courageous** boy reporter to the Belgian Congo in what was seen as “deepest, darkest” Africa—at the time a Belgian **colony**. There the **adventurers** hire a local guide, visit **remote** villages, even **encounter** \_\_\_\_\_. So far, so normal for an **explorer**. But it’s the language and imagery used in the **comic** that has caused **outrage** in those critical of it.

The guide looks like a \_\_\_\_\_ —with a black \_\_\_\_\_, large eyes, and \_\_\_\_\_, red **lips**. And the views **adopted** are **racist** and **colonialist**. The Belgian writer and **illustrator** Hergé later said he **regretted** writing it—a style that reflected the **intolerant outlook** of the time.

But that’s not Bienvenu Mbutu’s **perception** of it. He’s a Congolese national living in Belgium, and he’s asking the courts to **ban** the book, although he says he would be satisfied if it was sold with a warning about the content.

Example 5: Land-based

3. It can be difficult to convince people who have been harmed or have the potential of being harmed by an apex predator to think beyond their immediate concerns to see the benefits of apex predators to nature overall.
4. *Possible answer:* The loss of apex predators has a more damaging effect on ecosystems than the loss of species further down the food chain.
5. The writer is in favor of protecting apex predators. The writer signals this by providing several cases that show the harm caused by reductions in apex predators. Although the writer gives both negative and positive views of apex predators, on balance more time is given to discussing the damage caused by reductions in apex predators. The writer ends the passage by showing readers that we, too, are part of Earth's ecosystem and need to do our part to protect it.
