State verbs

Some verbs describe a state, not an action.

These verbs do not have a continuous form. We use them only in the present simple form. These verbs are:

- see, look, hear, sound, smell, taste, feel

(have lunch = eat, action verb)
- *I think you're right.*

see	see (= meet)
look (= appear)	look
smell (= have an odour)	smell
feel (= have texture)	feel (= give an impression)

Matt Taylor, the well-known basketball player, got a nasty shock during the basketball game last Friday. He was trying to steal the ball from Ricky Fitz, a player for the other team, when a gigantic St Bernard's dog jumped on him, threw him to the ground and held him down with his huge paws. All the players tried to help, but the dog didn't move. However, when Ricky Fitz ordered the dog to get off the court, it left immediately! After the game, Ricky explained. 'That was my dog, Bernie. He used to be a police dog. In his mind, when he jumped on poor Matt, he was attacking a nasty thief!'

Just a thought ... from the editor

I've been looking through some old photos just now and I've found one that dates back to 1982. It's a photo of my parents, on their way to a party, on the last day of school. My parents have known each other since primary school and have been married for eighteen years. The two young people have changed quite a lot since then – Dad's lost most of his hair, for a start! Back in 1982, as I see in the photo, Dad had to carry his stack of heavy vinyl LP records from party to party – I can fit endless hours of music in one tiny MP3 player. We also have mobile phones, high-speed Internet and digital cameras.

Yes, many things have changed, but, on the other hand, have you ever thought about how some things have stayed the same? If I look at the photo more closely, in the background, I can see Mr Thomson's bakery. Everyone in my family loves his famous teacakes and he's been making them since 1957. Next to the bakery, there's 'Bookworm', the bookshop. It first opened in 1906, so it has been doing business for more than a century!

I'd like to hear of more places like that. If you want to help, walk around our town and find out what hasn't changed at all in the last thirty years, or more. Send your emails to:

Use

We use the present perfect to talk about

- something that happened in the recent past and its results affect the present.

I've left my book at school. I can't do my homework now!

- something that happened in the past, but we do not mention when.

A new restaurant has opened near the cinema.

- a state that began in the past and continues up to the present.

She's worked in this shop since 1997.

I've known him since we were four years old.

- our experiences, something we have or have not done.

We've been on a hot air balloon flight.

I've seen all his films.

- We often use *ever* and *never* with the present perfect when we talk about our experiences. We use *ever* in questions.

Have you ever done an extreme sport?

- We only use *never* in positive sentences. The meaning of a sentence with *never* is negative: *never* + positive verb = negative meaning.

We have never met. ✓

I haven't never played golf. X

Form

We use *have / has* and the past participle of the verb to form the present perfect.

We form the past participle of regular verbs by adding *-(e)d* to the infinitive.

look → *looked* *change* → *changed*

travel → *travelled*

Irregular verbs do not follow a rule. Each verb has a different past participle.

make → *made* *cut* → *cut* *give* → *given*

teach → *taught*

Present perfect or past simple?

We use both the past simple and present perfect to talk about something that happened in the past. The difference is that

- we use the past simple to talk about something that happened at a specific time in the past. We either say or imply exactly when it happened.
- we use the present perfect to put emphasis on the fact that something has happened. We do not say when exactly it happened.
- Compare the examples:

I bought this CD last week.

They read this book when they were at school.

I've bought a new CD.

They've read this book.

- We use the present perfect to talk about our experiences to put emphasis on what we have / haven't done. When we ask specific questions or give specific details about them we use the past simple.

'Have you ever seen an elephant?'

Yes, I have.'

'Where did you see it?'

'I saw it at London Zoo.'

It's Lonely at the Top ...

Chatsbridge village green.

Mike Benson, the film director talks about the making of his latest film.

'We were in the village of Chatsbridge, I think. We **had** been filming a war scene on the village green since early in the morning, so by 7 p.m. everyone was exhausted. After the film crew had left, the village green was almost empty, except for me and my assistant – we had stayed behind because he wanted to show me something. Suddenly, I heard a voice from above. I looked up and saw a man in full paratrooper gear, hanging from the highest branches of the tallest tree. During the filming of a scene, he had jumped off a plane with his parachute, but it hadn't opened at the right time so he had landed on the tree, right in the middle of the village. The poor man had been stuck there for six hours before anyone noticed him! When he finally got down he said: 'There was a lot of noise during the filming, so nobody heard me calling for help. But I'm not complaining. I had an excellent view from up there!'

Mike Benson's new film, *'Lt Smith's War'*, is out this week.

Tomorrow we ⁵ the castle near the lake – again. Well, we tried to go there yesterday, but there was a 'slight' problem. We ⁶ twenty miles or so, when, right in the middle of nowhere, the car stopped. 'An apple a day ...'

Can you finish the sentence above? If you can, then you know all about good eating habits. If you don't, read some of the questions below. Ms Saunders, PE teacher and nutritionist answers them for you.

- Q:** How can I make sure I get enough vitamins?
A: Eat lots of fruit and vegetables. It's better to eat them raw because some vitamins are destroyed by cooking.
- Q:** Why do I have to drink a lot of water? I don't drink much water, but I drink three or four cans of fizzy drinks a day. Is that OK?
A: Nobody can survive without water. You should drink at least two litres of water a day, to help your body get rid of toxins. You may also drink some fresh juice or herbal tea, but don't drink many fizzy drinks: you'll put on weight and they're bad for your teeth, too.
- Q:** Is chocolate bad for you? I can't live without it!
A: Relax. There's nothing wrong with chocolate, but don't eat too much. Eat a little of everything and you'll be fine.

Countable nouns

Countable nouns are the things we can count. These nouns always have a plural form.
One egg, three pencils, six bags, twenty people.

Uncountable nouns

Uncountable nouns are the things we cannot count because of their nature: they do not have a constant shape or quantity and they do not form units by themselves. These nouns do not have a plural form.

I need some air.

This tea smells wonderful.

Uncountable nouns are

- all liquids and gases
e.g. *water, milk, petrol, air, helium* etc
- some solids
e.g. *sugar, flour, butter, chocolate, sand, dust* etc
- material nouns
e.g. *metal, wood, wool, hair, plastic, paper* etc
- abstract nouns
e.g. *love, friendship, work, help, advice, news, information, time, room* etc
- generic nouns
e.g. *furniture, luggage, money, rubbish* etc
- When we want to count quantities of uncountable nouns we use units of measurement or count their containers.
a litre of (cream) a glass of (water)

*a bottle of (juice) a tin of (soup)
a kilo of (sugar) a jar of (honey)
a bar of (chocolate) a carton of (milk)
a tub of (ice cream) a packet of (nuts)
a cup of (tea) a loaf of (bread)*

- We use the expression *a piece of (+ noun)* both for concrete and abstract nouns.
A piece of cake, a piece of metal, a piece of luggage, a piece of jewellery, a piece of news, a piece of information, a piece of advice, etc
- Some nouns appear both as countable and as uncountable but with a different meaning.

Plural nouns

- Some nouns appear only in plural form, although we talk about one unit. They refer to things that have two parts. We use the expression *(a) pair of* to count them.
*A pair of jeans / trousers / shorts / tights / leggings / glasses / sunglasses / scissors, etc.
I need a new pair of jeans.
She's got six pairs of glasses.*
- Nouns that refer to a group of people or things are used with a plural verb.
*police, team, clothes, stairs, etc
Our team are doing their best.
The stairs are more tiring, but they're better exercise than the lift.*

<i>hair</i> <i>Your hair is lovely.</i>	<i>a hair</i> <i>There are three hairs on the floor.</i>
<i>room (as space)</i> <i>There isn't any room for your clothes in my wardrobe.</i>	<i>a room (as part of a house)</i> <i>There are four rooms in this house.</i>
<i>glass (as material)</i> <i>Glass allows light to go through it.</i>	<i>a glass (as container)</i> <i>Can we have two glasses of water?</i>
<i>paper (as material)</i> <i>Paper is made from wood.</i>	<i>a paper (as document)</i> <i>My lawyer gave me three papers to sign.</i>

The TeenLink Files: Glass

Glass is made from sand, soda ash, lime and cullet. Cullet is recycled glass that has been crushed into a powder. To make glass, the first three ingredients are carefully weighed and mixed by the glass maker. Then he / she adds cullet to the mixture. The mixture is melted in special furnaces until it looks like thick syrup. When it cools, this syrupy mass becomes glass. After it has been given its final shape, the glass is reheated and then cooled. This is done to make it stronger.

Glass can be given almost any shape. Today glass is made in factories, but in ancient times it was made by hand. No one knows exactly when or where glass was first made, but it was produced as far back as 2000 BC by the Egyptians and perhaps the Phoenicians. The oldest method used to shape glass was blowing. A ball of melted glass was placed at the end of a long iron pipe and the glass maker blew air into it, just as we do with balloons today, but more gently. This way the glass at the end of the pipe could be blown into any shape and thickness. This method is still used today to produce hand-made glass objects and objects of art.

- We use the passive form when we want to focus on the action itself, not who performs it.

Compare the following sentences:

Hair Fashions in Ancient Egypt

Do you spend hours styling your hair in the morning? If you had been an Ancient Egyptian, things would have been different. Read about hair fashions of that time and find out why ...

In ancient Egypt, common people had their hair cut short.

Rich Egyptians had hairdressers to look after their hair. They had it washed and perfumed very often. Both men and women wore wigs for formal occasions. These wigs were made from human hair or wool.

Priests had their heads shaved to honour their gods. This was also a sign of cleanliness.

Children had their heads shaved, too, except for long, thin strands of hair on the side of their head. This was in honour of the god Horus – he had worn his hair like that when he was a child.

Read the information.**Adjectives**

We use adjectives

- before a noun to add information about it.
She has a beautiful house. This is a big car.
- after the verb to be to give information about the subject of the verb

He is tall. This building is new.

- after verbs of the senses (e.g. *look, seem, sound, smell, taste, feel*)

She looks young for her age.

This perfume smells wonderful.

Comparative form of adjectives

- (1–2 syllable adjective) *-er than*
Tom is taller than Nick.
- *more* (2+ syllable adjective) *than*
He is more intelligent than you.

Use

We use the comparative form to compare two people, animals, objects or situations between them.

Dan is older than I am.

Your joke was funnier than mine.

The film was more interesting than I had expected.

Superlative form of adjectives

- *the* (1–2 syllable adjective) *-est*

- *the most* (2 + syllable adjective)
He is the most intelligent person I know.

Spelling rules for adjectives → page 141.

Some adjectives form the comparative and superlative irregularly. They are listed in the tables on page 90.

Use

We use the superlative form to compare one person, animal, object or situation with a number of others. With the superlative, we single out this person (animal, etc) from the rest because it has the quality that the adjective describes to the highest degree.

She is the fastest runner in her team.

Fred is the youngest in his family.

This is the most expensive pair of jeans in the shop.

This is the silliest thing you've ever done.

Adverbs

We use adverbs

- to give information about how something is done (adverbs of manner), when it is done (adverbs of time) or where something is (adverbs of place).
- Adverbs of manner are formed by adding the ending *-ly* to the adjective. Some adverbs are formed irregularly (e.g. *good–well*).

The adverb goes

- after a verb that doesn't have an object or after the object

She plays tennis well. They opened slowly.

- before an adjective or participle that is used as an adjective

It is terribly easy to do this.

The engine is carefully designed.

Comparative form of adverbs

- *more* (2 + syllable adverbs or adverbs that end in *-ly*) *than*
He played more carefully than his brother.

Superlative form of adverbs

- *the most* (2+ syllable adverbs or adverbs that end in *-ly*)
It was the most beautifully wrapped present I had ever seen.

Spelling rules for adverbs → page 141.

She writes more neatly than you do.

They behaved the most irresponsibly of all.

Please note that the adverb *far* has two comparative and superlative forms

Fact or fiction? by Harry Davis

Vroom!

The cheetah is ¹ *the fastest* (fast) animal on land. *It's a fact. A cheetah can reach a speed of 110 km an hour (and it doesn't need any fuel!)*

The snail is ² (slow) animal in the world.

Don't know for a fact, but I'm working on it! I wonder how long a 'snail race' takes, though!

A hippo is ³ (fast) a man!

Believe it or not, it is! So don't think you can make fun of one and run...

See you later alligator!

Alligators can grow to 6 m long.

Fiction, but close. The ⁴ (long) alligator was 5 m 84 cm (recorded in 1900).

The ⁵ (rare) alligator is the Chinese alligator.

Fact. He's a beauty in the photo, isn't he? (He could use a dentist, though...)

Big is beautiful

The African elephant is ⁶ (heavy) of all animals.

Fiction. The African elephant may be the winner on land but the blue whale is ⁷ (big) the African elephant. In fact, it is the ⁸ (large) animal in the world!

So long!

A giraffe can be ⁹ (tall) a tree.

Fact. A giraffe can grow up to 5.5 m. I hope it's not windy up there!

The Asiatic python is ¹⁰ (long) a boat.

I'd say fact and fiction, because it depends on how long the boat is! An Asiatic python can grow up to 10 m in length.

PC Game Review

'Changing Worlds 1' and 'Changing Worlds 2'

by Peter Hardy

First of all, I had never played 'Changing Worlds 1' before I played 'Changing Worlds 2'. I only got CW1 (that's 'Changing Worlds 1' for short ...) just to see if it was ¹ as boring as CW2 but I was pleasantly surprised. CW1 was ² than CW2. The characters were ³ and the adventures ⁴ than in CW2. CW1 also has ⁵ features I have ever seen in a game: you can make the hero look exactly like you! I just wonder why they didn't use this in CW2. I wouldn't go so far as to say that CW2 is the ⁶ game I have ever played, but it certainly comes close! One final word; although the graphics in CW1 aren't ⁷ in CW2, it still is ⁸ game.

| 1 a more boring | b boring | <u>c as boring</u> |
| 2 a far interesting | b far more interesting | c much interesting |
| 3 a more realistic | b most realistic | c much realistic |
| 4 a more exciting | b not so exciting | c as exciting |
| 5 a much better | b the far better | c the best |
| 6 a far most boring | b most boring | c not so boring |
| 7 a so advanced as | b as advanced | c more advanced |
| 8 a the much better | b the better | c a far better |

Read the information.

The infinitive

The infinitive is the basic form of a verb.

We use two forms of the infinitive

- the infinitive with 'to'

I want to play a game.

- the infinitive without 'to'

You'd better take a map with you.

Infinitive with 'to'

We use the infinitive with 'to'

- after these verbs:

advise	expect	plan
agree	force	prefer
allow	forget	promise
appear	hate	refuse
arrange	help	seem
ask	hope	start
begin	learn	stop
choose	like	want
continue	manage	would like
decide	offer	would love

They asked me to play the piano at the school concert.

I hope to see you soon.

She refuses to speak to him.

We would like to have lunch now, please.

- with the expression *too* + adjective / adverb + infinitive

She's too tired to go out tonight.

- The word 'too' before an adjective / adverb gives a negative meaning to the sentence. It means 'more than it should be' or 'more than is necessary'.

He is too young to drive. (= he isn't allowed to drive because of his age)

- with the expression (not) adjective / adverb + *enough* + infinitive

It's warm enough to play outside.

I am not tall enough to reach the shelf.

- The word 'enough' gives a positive meaning to the sentence. It means 'just as much as it should be' or 'just as much as is necessary'.

He's good enough to be a professional musician.

(= he can be a professional musician if he wants to)

- with the expression *it* + *to be* + adjective + infinitive

It's nice to go on a short holiday when you can.

It was interesting to learn that the temple dated back to the 4th century BC.

- with the expression *subject* + *to be* + adjective + infinitive

They were happy to offer me the job.

I'm sorry to hear you are not well.

She's glad to be in the play.

Infinitive without 'to'

We use the infinitive without 'to'

- after the verbs *let* and *make*

I'll let you use my computer if you are careful.

My music teacher made me play the same piece three times.

- with the expression *would rather*

I'd rather do this on my own if you don't mind.

He'd rather stay in a hotel.

- with the expression *had better*

You'd better book the tickets as soon as possible.

She'd better not sing. She has an awful voice.

- after some modal verbs, such as *could*, *may*, *might*, *must*, *should*

He must call his parents right now.

You shouldn't wear my T-shirt without my permission.

- The verb *help* can be followed by both the infinitive with 'to' and the infinitive without 'to'. It makes no difference in meaning.

Will you help me carry these bags?

Will you help me to carry these bags?

Speechless!

by Lucy Hardy

That's what I was when I met my favourite film star in person! I was buying a magazine with my friend, Sophie, when I saw Daniel Radcliffe standing next to me. I almost fainted! Sophie, who's better at these things than I am, asked Daniel if he could give us his autograph and Daniel said he'd be glad to. He had some photos on him, but he didn't have a pen so he asked me if I had one. I was so thrilled to see him that although I opened and closed my mouth, no words came out! Daniel asked if I was OK and Sophie said that I usually didn't know when to stop talking. She added that it was the first time she had seen me speechless. Daniel laughed, signed the photos for us and waved goodbye. I don't know how long I just stood there, unable to move. I told Sophie that I couldn't believe what had just happened. Well, at least I've got the photo to prove it!

Direct speech

We use direct speech when we want to tell someone what a third person has said using the exact words. By doing this we 'quote' what this person has said.

We use a reporting verb and quotes (' '). The most common reporting verbs are *say* and *ask*.

Ed said, 'I play volleyball every week.'

They asked 'Where is the teacher's office?'

Reported speech**Statements**

We use reported speech when we want to tell someone what a third person has said but without using the exact words.

We use a reporting verb but we do not use quotes. The most common reporting verbs in reported statements are *say* and *tell*. We can use the word *that* to introduce the reported sentence if we like.

He said, 'I'm having a good time.'

(direct speech)

He said (that) he was having a good time.

(reported speech)

What changes from direct to reported statements?

- The reporting verb.

Direct speech	Reported speech
John said, 'I am tired.'	John said (that) he was tired. (reporting verb without indirect object)
John said to me, 'I am tired.'	John told me (that) he was tired. (reporting verb with indirect object)

- Personal pronouns, object pronouns and possessive adjectives.

All changes are made according to who is talking about whom. For example:

Direct speech	Reported speech
George said to me, 'I like you'. (subject pronoun) (object pronoun)	George told me he liked me.
Kate said, 'My room is a mess!' (possessive adjective)	Kate said (that) her room was a mess.

- Verb tenses.

We change verb tenses when the reporting verb is in the past simple. We do this because we are now at a different point in time from when the actual words were spoken. For example:

Direct speech	Reported speech
Last Saturday, Peter said, 'I'm going to the cinema.'	Last Saturday Peter said (that) he was going to the cinema.

At the time we are speaking, Saturday is in the past.

We have to change the tense to show this.

You will find a table that shows how tenses change from direct to reported speech on page 108.

- Time expressions, adverbs of place and some verbs that show movement.

Again, these changes are made to reflect the difference in time and place between direct

speech (when the words were actually spoken) and reported speech (when and where the person who reports these words is at the moment).

8 Read the information.

When we want to report whole paragraphs, we don't use a reporting verb before each sentence. We usually join sentences that are relevant with *and* or *because*. This way we only use a reporting verb in the first sentence.

He said that the museum was wonderful and that we should visit it one day.

She said she would have to leave early because she was very tired.

We also try to use as many different reporting verbs as we can to avoid repetition.

When Lightning Strikes ...

by Harry Davis

Although we don't expect them, thunderstorms are quite common in spring and summer. Despite lasting a short time, thunderstorms are dangerous because they produce lightning, which can kill.

If you see lightning, which is a flash of light, and can hear thunder, which is a loud rumbling noise, you are so close to the storm that you might be in danger. Go to a safe place immediately, such as a house or a car. Whatever you do, don't stand under a tree. Trees attract lightning and it is not safe to shelter under them because of this.

Don't use the telephone or anything electrical because if lightning hits, it can travel through the electrical wires. It can travel through water, too, so don't take a bath or a shower. Swimming in the sea is also dangerous.

Read the information.**Relative clauses**

The man answered the phone. (main clause)

The man was my dad.

(information about the subject of the main clause)

The man who answered the phone was my dad.

(relative clause)

Relative pronouns

We use relative pronouns in the beginning of a relative clause. Relative pronouns refer to a noun in the main sentence and they come directly after it. Here's a list of relative pronouns:

- *who* for people
- *whom* for people
- *which* for things or animals

Defining relative clauses

Defining relative clauses give essential information about the noun they refer to. Without them, the main clause doesn't make sense. Look at the example:

The people are very noisy. (main sentence)

They live in the flat above ours.

(essential information)

The main clause doesn't make sense unless we define who we are talking about.

This information comes in the relative clause.

The people who live in the flat above us are very noisy.

- We place a defining relative clause directly after the noun it defines, without using a comma to separate them.

The woman who had found the lost cat was happy to return it to its owner.

- When we speak we prefer to use *that* instead of *who* or *which*.

What's the title of the song that is playing now?

- When the relative pronoun (*whom*, *which*, *that*) is the object of the relative clause, we usually leave it out.

The book is very good. (main clause)

You gave me this book. (*this book* is the object)

The book (that) you gave me is very good.

- We never leave out the relative pronoun if it refers to the subject of the main clause.

The book is very good. (main clause)

The book won the prize. (*the book* is the subject)

The book that won the prize is very good.

Non-defining relative clauses

- Non-defining relative clauses give us extra information about the noun to which they refer. The information is not essential because the main clause is complete without it.

Tom Davis is a well-known writer. (main clause)

Tom Davis is Harry's uncle.

(extra information about the subject of the main clause)

Tom Davis, who is Harry's uncle, is a well-known writer.

- We place a non-defining relative clause directly after the noun it defines. We use commas to separate the non-defining clause from the main clause.
- We never leave out the relative pronoun in a non-defining relative clause.
- We don't use the relative pronoun *that* in non-defining relative clauses.

Mr Brown's car, which was parked illegally, was taken away.

Sandra, whom you met last night, is a doctor.

3 Complete with a relative pronoun. If you have two options, write both of them.

- Did you eat the cake *which / that* was on the table?
- Steven, had never been to the zoo before, was delighted.
- The teacher introduced us to the new student, we had already met.
- Mary's wearing the dress I bought for her for her birthday.
- The man luggage had been lost made a complaint to the airline.
- Is this the house Charles Dickens lived?
- The woman spoke to me was very rude!
- That was the day Oliver got his driver's licence.
- PJ Rivo, real name is John Smith, stars in a new film.
- Manchester is the town most of Ian's family live.

4 Cross out the relative pronoun where it can be omitted.

- The printer ~~which~~ I bought last month has broken down.
- I'm reading the book which you gave me.
- The man who plays the electric guitar in this group is my cousin.
- The woman whose bag had been stolen went to the police.
- In the safari park, the lion that was nearest to our car tried to jump on it.
- A man whom I had never seen before was sitting in my kitchen.
- George knows someone who can help us.
- The T-shirt that he's wearing is mine.
- Is this the boy whose brother won the competition?
- The girl that he has brought with him is a relative.

Whose is never omitted from the relative clause.

The **Help!** page

I'm new to this school and I have no friends here. The problem is that I'm too shy to start a new friendship. When I see kids hanging out together and having a good time I feel jealous and I'd really like to join them, but it's like something holds me back. I keep thinking 'What if they reject me?' I miss all my old friends and I'm fed up with being on my own most of the time.

What shall I do?

Patrick, 11

Well, Patrick, there is nothing to be afraid of. If you hold back because you are scared of rejection you will never get anywhere! You must believe in yourself and show it. First of all, don't wait for someone else to come and ask to be your friend. Take care of it yourself. Why don't you start by talking to one of your classmates, maybe the one sitting next to you in class? Invite him or her to go to the cinema with you and see how it goes. If you make just one friend, he or she will introduce you to his or her friends, and so on. Soon you will be wondering what you were worried about in the first place!

Get the Job!

For those of you who are leaving school or looking for a summer job, here's some useful advice from Ms Elaine Wood, who's a career guidance counsellor.

If you are keen ¹ making a good impression, you might want to consider the following:

When you apply ² a job, never lie ³ what you can do. You will soon be found out.

Take care over how you look for the interview. You should wear clean and tidy clothes.

Arrive ⁴ the place of the interview ten minutes early. This will give you time to collect your thoughts before you go in.

If you are late for some reason, apologise ⁵ being late.

If there are other people waiting for an interview, wait ⁶ your turn patiently. Don't walk up and down the room, looking at your watch.

When you go in for the interview you need to show that you are very interested ⁷ the job. Don't be afraid to ask questions if you have any.

You don't have to agree ⁸ everything the interviewers say. They might think you don't have any opinions of your own! But you shouldn't argue ⁹ them, either.

Listen ¹⁰ all the questions carefully and answer them clearly.

If the interviewers say that you'll hear ¹¹ them, thank them and go ¹² of the room. With a bit of luck, you'll get the job!

The **Help!** page

My best friend got two kittens as a present from her aunt ¹ *on* her last birthday. Evie (that's my friend's name) is crazy ² them. They sleep ³ her bed and they are very friendly and playful. The thing is, I have never been keen ⁴ cats, but I now I have discovered that I am allergic ⁵ them! I start to sneeze and my eyes water whenever they come near me. I am annoyed ⁶ Evie, who does not take this seriously and says that I'm just jealous ⁷ them! She really seems more interested ⁸ her cats than me!

Lea, 12

First of all you should make your friend listen ⁹ you. You need to explain ¹⁰ her that an allergy is not something you can choose to have. But be careful not to get carried ¹¹ and start a fight, though. Tell her that she needs to look ¹² your friendship in the same way as she takes ¹³ of her cats. Then you must work ¹⁴ the technical stuff, like where you should meet so that you don't have to come near the cats. I'm sure that once she realises there really is a problem she will be glad to do something about it.

Hi, my name's Tessa and I'm thirteen years old. I live ¹ in Hill Street with my mum, my gran our two dogs, Elsie the cat, two parrots and a hamster.
